Effluent Pumping Systems

for  
Onsite  
Wastewater  
Collection  
and  
Treatment

- Ideal for:
- Effluent sewers
  - Drainfields
  - Sand filters
  - Peat filters
  - Textile filters
  - Mounds
  - Trickling filters
  - Aerobic units
  - Wetlands
  - Lagoons
  - Effluent irrigation
  - Other applications

# Design, Engineering, and Support

## Unmatched Technical Support

When you specify, purchase, install, or service Orenco products, you tap into a wide range of technical support services.

### Distributor Network

Orenco's products are available from about 200 different Distributor locations. Distributors stock products, provide customer service, and help with system design, product takeoffs, ordering, shipping, and more. For a list of stocking Distributors, go to [www.orenco.com](http://www.orenco.com) and click on "Distributor Locator."

### Orenco Technical Sales and Engineering

If there isn't a Distributor in your region, Orenco's Tech Sales and Engineering staff provide professional customer service, including plan reviews. When you call our toll-free number for information and assistance, you'll talk to a wastewater specialist with practical experience in effluent pumping system design, construction, and maintenance.

### Design Aid CD-ROM

Our Design Aid CD-ROM saves layout and drafting time. The CD-ROM includes more than 200 scaled AutoCAD® and PDF drawings and our exclusive Pump Select™ software that provides fast, error-free hydraulic calculations for pump sizing. It also includes our General Specifications document, as well as media gradation charts for use when designing sand and gravel filters.

### Supportive Literature

Each ProSTEP™ Effluent Pumping System comes with installation and maintenance instructions. There's also a Homeowner's Manual for the property owner, with Do's and Don'ts for preventive maintenance. Spec sheets, product sheets, and additional color brochures are also available, by request.

## Web Sites

Orenco maintains two web sites

[www.orenco.com](http://www.orenco.com) includes an extensive technical library that lets you find answers and view all product and system information around the clock.

- [www.vericomm.net](http://www.vericomm.net) (coupled with our VeriComm® telemetry control panels), allows password-holders to manage alarms and monitor/control their systems remotely. (See our online demo on the home page; no password required.)

# ProSTEP™ System Components

## Complete, Lightweight Package

ProSTEP Effluent Pumping Systems are a fully-integrated package, with seven compatible components. No need to shop for parts and pieces. In-tank equipment is lightweight, comes preassembled, and installs neatly into most tanks, saving time and money.

### 1 Biotube® Pump Vault

- Pump vault comes in standard and custom heights.
- Handle assembly aids removal of filter cartridge.
- Biotube filter goes longer between cleanings than other brands.
- External flow inducer accommodates one or two pumps.

### 2 Splice Box

- Protects splices
- Easy to access
- Meets NEC requirements
- Corrosion-proof

# STEP™ System Components

## 4 Float Switch Assembly

- Provides level control
- Quick-release stem
- Adjustable float collars
- Variety of floats, float arrangements

## 6 Effluent Pump

- Life of 25+ years with routine cleaning
- Lasts 3-4 times longer than conventional effluent pumps
- Minimum 24-hour run-dry capability
- Easy to service in the field
- Lightweight (about 25 pounds)
- Noncorroding stainless steel construction
- UL and CSA listing for wastewater applications
- A variety of pump power/sizes available; low power costs
- 5-year warranty available

## 7 Control Panel

- Engineered specifically for wastewater applications
- Highest quality components, NEMA 4X-rated enclosures
- "Smart" digital programmable panels and telemetry panels available
- UL listed; standard configurations available to meet requirements of NEC Class I, Division 1 or 2
- 3-year warranty

## 3 Risers, Lids, and Accessories

- Allow easy access to tank
- Attractive, nonskid lids
- Strong and lightweight
- Tamper-resistant

## 5 Discharge Assembly

- Flexible design eliminates "hard plumbing"
- Quick disconnect unions, ball valves
- Available for special situations (cold weather, deep bury, etc.)
- Provides easy access

# STEP Effluent Pumping Systems

## ProSTEP™ Protects, Transports, Filters

Twenty years ago, Orenco Systems®, Inc. pioneered and packaged the modern filtering pump vault for onsite wastewater collection and treatment. Today, about 80,000 ProSTEP Effluent Pumping Systems are in service all over the world. They transport and filter wastewater from watertight septic tanks and dosing tanks, protecting "downstream" lines, drainfields, and other treatment systems. The pump vault's patented\* Biotube® filter has several times the capacity of other filters and removes about two-thirds of suspended solids, on average.

### "Easy Access" Design Aids Maintenance

The pump vault's "easy access" design allows service providers to remove the Biotube® filter cartridge without pulling the pump or vault. And the float assembly's quick-release float stem and adjustable float collars make it easy to remove and adjust.

### Quality Components Outlast Others

ProSTEP™ Effluent Pumping Systems are superior in quality and outlast other brands. Constructed of stainless steel, thermoplastic, and fiberglass, they're corrosion-resistant and durable, reducing lifetime system costs.

### Advanced Controls Available

For a modest incremental cost, advanced control panels are available . . . control panels that give peace of mind to property owners, system designers, contractors, service providers, and regulators. MVP digital programmable panels allow easy, accurate setting of multiple parameters and the use of one type of float for all functions. VeriComm® remote telemetry panels are coupled with the web-based VeriComm® Monitoring System, which verifies and communicates system operation round-the-clock, while remaining invisible to the homeowner.

Easy access design

\* Covered by U.S. patents  
4,439,323 and 5,492,635.  
Foreign patents pending.

# STEP™ Effluent Pumping Systems

Orengo Systems is owned and managed by engineers who develop wastewater systems that work — systems based on sound science.

Clockwise from left:  
Eric Ball, P.E., Jeff Ball, P.E., Hal Ball, P.E.,  
(front) Terry Bounds, P.E.

## Carefully Engineered by Orengo

Orengo Systems has been researching, designing, manufacturing, and selling leading-edge products for small-scale wastewater treatment systems since 1981. The company has become an industry leader, with more than 180 employees and with distributors representing most of the United States, Canada, parts of Europe, New Zealand, Australia, and Chile. Our systems have been installed all over the world.

*Your health is our priority. At Orengo Systems, we are committed to "Changing the Way the World Does Wastewater®."*

Orengo maintains an environmental lab and employs more than a dozen civil, electrical, mechanical, and manufacturing engineers. Orengo's systems are based on sound scientific principles of chemistry, biology, mechanical structure, and hydraulics. As a result, our research appears in numerous publications, and our engineers are regularly asked to give workshops and offer trainings.
